threshold amount of current wherein none of the electronic components has rating by itself to protect the external circuit in combination with the other claim limitations.

4. Claims 2-12 are dependent on allowable Claim 1 and therefore allowable.

5. Independent Claim 13 is allowable because none of the prior art of record disclose an apparatus for protecting an external circuit against occurrence of an adverse electrical event in which the internal circuit includes elements adapted to pull up a voltage at one of the terminals when the voltage at the terminal drops and elements adapted to pull down the voltage at the one of the terminals when the voltage at the terminal rises in combination with the other claim limitations.

6. Claims 14 and 40 are dependent on allowable Claim 13 and therefore allowable.

7. Independent Claim 25 is allowable because none of the prior art of record disclose a protection circuit comprising a first and second protection mechanism to provide different kind of protection for external circuit using at least two controlled

8. Claims 26-36 are dependent on allowable Claim 25 and therefore allowable.

9. Independent Claims 41 and 42 are allowable because none of the prior art of record disclose an apparatus for protecting an external circuit against occurrence of an adverse electrical event in including an energy reservoir at a predetermined voltage, and in which the protection mechanism shunts current to the energy reservoir in combination with the other claim limitations.
